Dr. Natasha Alkhatib
Researcher in Artificial Intelligence and Cybersecurity
Paris, France

Paris, October 16, 2026

To: Faculty of Engineering, Tripoli Branch
Lebanese University

Subject: Internship Completion and Validation Letter

To whom it may concern,

I, the undersigned, Dr. Natasha Alkhatib, researcher in Artificial Intelligence and Cybersecurity based in Paris, hereby certify that **Mr. Taha Cheikh**, a fourth-year student at the Faculty of Engineering of the Lebanese University (Tripoli), has successfully completed his summer internship under my supervision from **July to September 2026**.

The internship focused on **Red Teaming AI Systems**. Taha worked on the design and implementation of an automated red-teaming framework that probes open-source Large Language Models for prompt injection, jailbreaks and other adversarial weaknesses, and generates scored audit reports. The project was carried out in two phases:

- **Phase 1 – Automated attack testing:** setting up promptfoo to run automated attack campaigns against LLaMA, Mistral and Falcon models served locally through Ollama, covering the scenarios of the OWASP Top 10 for LLM Applications.
- **Phase 2 – Scoring and reporting:** building a scoring engine and a Streamlit dashboard to visualize results and automatically generate an audit report for each model.
- **Technical stack:** Python, promptfoo, Ollama, Adversarial Robustness Toolbox (ART), Streamlit.

Throughout the internship, I greatly appreciated Taha's skills and professional attitude. He was committed, reliable and eager to learn, and he approached each task with seriousness and curiosity. On his own initiative, he earned the **Hugging Face LLM certificate**, which strengthened his understanding of large language models and directly benefited the project. He also began developing a genuine **hacker mindset**: thinking like an attacker, questioning assumptions, and creatively searching for the ways AI systems can fail. This is an essential quality for anyone working in AI security.

I therefore validate his internship and consider the work he produced to be of good quality. I am confident that Taha has a promising future in the fields of AI and cybersecurity, and I recommend him without reservation.

This letter is issued at the request of the student to serve whatever purpose it may deem appropriate.

Sincerely,

Dr. Natasha Alkhatib
Researcher in AI and Cybersecurity
Paris, France
